

I've been subscribing to XM Satellite Radio for 18 months. It has been the best thing that has happened to automotive travel since air conditioning. Now, where ever I travel I get the same stations with excellent audio quality. Because of the wide station choice I never get bored. XM Radio helps keep me alert as I make long trips across our country. Most of all, I appreciate getting the traffic & weather for the Houston area. The traffic broadcast is far more detailed than what you get on regular radio stations and I can get it almost instantly when I turn to that XM station. XM Radio has made my life that more enjoyable and I support the continued broadcast of the current channel lineup.
